PROFESSIONAL EXPERIENCE

Leonardo DRS – *Quality Engineer; Cypress, CA* Jan 2026 – Present
Quality Engineer Intern; Cypress, CA May 2025 – Dec 2025

- Lead receiving, in-process, final, and supported supplier source inspections of spaceflight hardware, applying GD&T, optical comparators, and Keyence measurement tools to quantify defects and verify conformance.
- Lead MRB and nonconformance on electrical optical mechanical hardware investigations to establish acceptance criteria, determine dispositions, revise drawings, and supported root cause/corrective actions.
- Partnered with engineering teams to introduce inspection checkpoints before critical features become inaccessible, improving production readiness, and reducing inspection bottlenecks.
- Trained team members on standards interpretation, inspection methods, and OIS creation, approval, and closure. Develop controlled training guides, work instructions, and master documentation supporting traceability and AS9100D compliance.

Lunar Oxygen Technologies (Startup) – *Testing Engineer Intern; Long Beach, CA* February 2025 – Dec 2025

- Designed prototype components in SolidWorks for CNC friendly machining enabling rapid reproduction of testing components.
- Performed balance tests, balloon deflation flow tests, and exhaust valve evaluations to optimize descent control.
- Utilized ANSYS simulations and FEA to evaluate structural bending across varying altitudes.

Fisher Machine Shop – *Machine Operator; Hawthorne, CA* June 2024 – May 2025

- Operated CNC machines to manufacture machining tools, holding tolerances within ± 0.001 . Applied DFM and lean manufacturing principles to improve manufacturability, reduce rework, and support efficient part flow.
- Performed post machining operations, including surface grinding, deburring, and secondary finishing processes, to improve flatness, roundness, dimensional accuracy, and surface condition.
- Applied Statistical Process Control (SPC) and root cause analysis to identify faulty equipment and worn tooling, reducing downtime by 12% and minimizing production bottlenecks.
- Coordinated outsourced heat-treatment operations with external suppliers and performed post-process inspections.

EDUCATION

California State University Long Beach – *Bachelor of Science – Mechanical Engineering BS* Jan 2023 – Dec 2025

Certifications: IPC J-STD-001 Certification, Space Applications Electronic Hardware Addendum to IPC J-STD-001

Projects/Research/Leadership Experience

Ethereum Mining – *Personal Project; Rosemead, CA*

- Boosted mining efficiency from 0.43 to 0.50 MH/W through thermal management, power optimization, and airflow redesign; improved system reliability and generated \$500/month profit with minimal downtime.

ASHRAE – *Vice President Of Professional Development*

- Led hands-on projects, workshops focusing on professional development, and smart building technologies, fostering practical learning and innovation.

Healthy Balance Research Lab – *Research Assistant; Long Beach, CA* Sept 2023 – Aug 2024

TECHNICAL SKILLS

- Microsoft Excel, Word, MRP/ERP, PLM Tools
- Solidworks, AutoCAD, 3D Printing
- Bilingual: English & Spanish
- Blueprint Reading, CAD/CAM, NX, CMM
- GD&T, Manufacturing Processes, Post Processing
- MATLAB, Ansys Fluent, FEA, Lean Six Sigma
